Education

BS Software Engineering, *The University of Lahore*
2016 – 2020 | Lahore, Pakistan

Skills

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+)

State Management: Redux Toolkit, Context API

Styling: Tailwind CSS, Material UI, SCSS

Integration: REST APIs, Axios

Tools: Git, GitHub

Concepts: Performance Optimization, Component-Based Architecture, Responsive Design

Experience

Front-End Developer (React.js | Next.js),
Kodex Technologies

04/2022 – 05/2026 | Lahore, Pakistan

- Led development of scalable web applications using React.js and Next.js
- Improved application performance by 25-30% using memoization and code-splitting
- Implemented Redux Toolkit, reducing state complexity and improving maintainability
- Integrated APIs and optimized data flow for better performance
- Mentored a team of 4+ developers and ensured timely delivery
- Built reusable UI components to speed up development

Front-End Developer, IT HUTS

09/2021 – 03/2022 | Sargodha, Pakistan

- Developed responsive web applications using React.js, TypeScript, HTML, CSS
- Collaborated with backend teams for API integration
- Built UI using Material UI and Bootstrap
- Improved performance and cross-browser compatibility

Front-End Developer, Kings Digital Solution

04/2021 – 08/2021 | Sargodha, Pakistan

- Built responsive UIs using HTML, CSS, JavaScript, Bootstrap
- Worked with designers and backend teams for UI improvements
- Followed clean code and best practices

Summary

Front-End Developer with 4+ years of experience building scalable and high-performance web applications using React.js and Next.js. Skilled in optimizing UI performance, managing state with Redux Toolkit, and creating responsive, user-focused interfaces. Experienced in delivering production-ready solutions in fast-paced environments.

Projects

Tangible 3D Shoe Customization

- Built a 3D shoe customization application using Next.js, Three.js, and GLB models
- Implemented real-time 3D rendering with interactive customization (colors, textures, parts selection)
- Integrated dynamic state handling for live preview updates without full re-render
- Optimized performance using lazy loading, code-splitting, and efficient asset management
- Handled responsive layout and ensured smooth experience across devices

Aurora – Clinical Research Negotiation Platform

- Built a full-stack SaaS platform (Next.js) to assist clinical research teams in budget and CTA negotiation workflows
- Developed a structured system to analyze contracts and highlight negotiation positions for review
- Implemented secure file upload system (PDF, DOCX, XLSX) for processing study documents
- Designed workflow-based UI for contract review, approval, and export of sponsor-ready outputs
- Built scalable frontend architecture with reusable components and responsive UI

Foxtcon Hotel & Staff Management

- Built a hotel/staff management system inspired by Connecteam for shift scheduling
- Implemented scheduling system with CRUD operations and role-based access
- Created dashboards for managing employees, shifts, and availability
- Used optimized state management and reusable components for scalability
- Focused on clean UI, performance, and maintainable architecture
